**Grants and Contracts:**

Licit & illicit Opioids: Comparative Studies in Humans

NIH R01 DA016718                      7/2004 - 7/2009                      \$557,582

Principal Investigator:              Sharon Walsh

Role: Co-Investigator

My role was to screen patients for safety prior to study entry. In addition, I monitored patients during and after experimental opioid administration to evaluate and treat potential cardiopulmonary complications.

Development of a Perfusion-Induced Systemic Hyperthermia Delivery Apparatus

NIH R42 CA 120616                      07/2010 - 06/2012                      \$504,080

Principal Investigator:              Joseph Zwischenberger

Role: Co-Investigator

My role was to screen patients for safety prior to induction of hyperthermia with investigational apparatus. In addition, I monitored research subjects during and after hyperthermia procedures to evaluate and treat potential cardiopulmonary, neurologic and other systemic complications.

Medications Development for Cocaine: A translational Approach in Monkeys and Humans

NIH RO1 DA033364                      02/2013 – 06/2018                      \$443,275

Principal Investigator:              Joshua Lile

Role: Co-Investigator

My role was to screen patients for safety prior to study entry. In addition, I monitored research subjects during and after experimental cocaine administration to evaluate and treat potential cardiopulmonary, neurologic and other systemic complications.

A Phase 3 Multicenter, Randomized, Double-Blind, Placebo-Controlled, Parallel-Group, Efficacy and Safety Study Comparing EG-1962 to SOC Oral Nimodipine in Adults with Aneurysmal Subarachnoid Hemorrhage.

Edge Therapeutics                      06/2016 – 06/2018                      \$162,390

Principal Investigator:              Kevin Hatton

Role: Site Principal Investigator

My role was to oversee the conduct of this research project at the University of Kentucky. I am responsible for all aspects of this study at this site, including regulatory, administrative, patient safety, and data reporting to sponsor.

Impact of Fever Prevention in Brain Injured Patients (INTREPID)

CR Bard Medical Division      08/2017 – 06/2018      \$176,650

Principal Investigator:      Kevin Hatton

Role:      Site Principal Investigator

My role was to oversee the conduct of this research project at the University of Kentucky. I am responsible for all aspects of this study at this site, including regulatory, administrative, patient safety, and data reporting to sponsor.

CCTS Drug Discovery and Development Pilot: Dysregulated CNS Inflammation after Acute Brain Injury

NIH UL1 TR001998      07/2017 – Present      \$50,000

Principal Investigator:      Linda Van Eldik

Role:      Co-Investigator

My role is to oversee the clinical component of the conduct of this research project at the University of Kentucky. I am responsible for overseeing all regulatory issues, subject consent, research samples, and overall study patient safety.

A Randomized, Double-Blind, Placebo- and Active-Controlled, Crossover Study to Evaluate the Abuse Potential of Oxymorphone Compared to Other Mu Opioid Agonists in Physically Dependent Opioid Users with Moderate-to-Severe Opioid Use Disorder

HHSF22320170120C      10/2017 – Present      \$1,798,321

Principal Investigator:      Sharon Walsh

Role:      Co-Investigator

My role is to screen patients for safety prior to study entry. In addition, I am responsible for monitoring patients during and after experimental opioid administration to evaluate and treat potential cardiopulmonary complications.

CATCH: A Proof-of-Concept Study to Evaluate the Administration of CN-105 in Participants with Acute Supratentorial Intracerebral Hemorrhage

Duke University      03/2018 – Present      \$191,486

Principal Investigator:      Kevin Hatton

Role:      Site Principal Investigator

My role is to oversee the conduct of this research project at the University of Kentucky. I am responsible for all aspects of this study at this site, including regulatory, administrative, patient safety, and data reporting to sponsor.

Influence of Orexin Antagonism on Motivation for Cocaine

NIH R01 DA048617      Under Review      \$1,239,202

Principal Investigator:      William Stoops

Role:      Co-Investigator

My role is to screen patients for safety prior to study entry. In addition, I will monitor research subjects during and after experimental drug administration to evaluate and treat potential cardiopulmonary, neurologic and other systemic complications during experimental study sessions.

**A Translational Determination of the Neurobehavioral Mechanisms of Maladaptive Dynamic Choice in Opioid Use Disorder**

NIH R01 DA047368                      Under Review                      \$3,596,253

Principal Investigator:                      Joshua Lile

Role:    Co-Investigator

My role is to screen patients for safety prior to study entry. In addition, I will monitor research subjects during and after experimental drug administration to evaluate and treat potential cardiopulmonary, neurologic and other systemic complications during experimental study sessions.

**Anesthesiology Critical Care Fellows Graduated:**

Anthony Dempsey	2014 – 2015
Robin Bush	2015 – 2016
Jasdeep Dhaliwal	2016 – 2017
Bjorn Olsen	2016 – 2017
David Bacon	2017 – 2018
Seth Lesch	2017 – 2018

**Anesthesiology Residents Mentored:**

Jason Garrison	2008 – 2012
James (Tony) Williams	2009 – 2013
Beril Abraham	2012 – 2016
David Bacon	2013 – 2017

**Master's Degree Students Advisory Committee:**

Matthew Hill (Healthcare Administration)	2007 – 2008
Amanda Harms (Immunology and Microbiology)	2015 – 2016

**UK CCTS Medical Student Mentored Research Fellowship (PSMRF):**

Andrew J. Clark	2015 – 2016
Tenley McKee	2016 – 2017
Austin Smith	2018 – Present
